

CARING FOR YOUR PRODUCT

Dispenser Brackets

- Clean regularly using a soft damp cloth and using non-chloride containing cleaning materials.
- Wipe off standing water.

Dispenser Bottles

- Ensure that no water or foreign materials get into the bottle.
- Ensure that the pump & neck of dispenser bottles are kept clean at all times.
- Dispenser bottles should be replaced every 6 months.

Bulk Liquid Refills

- Once opened, guarantee period is 12 months, provided correct storage and usage conditions are adhered to.
- It is suggested to use the product as soon as possible.
- Do not leave the cap off. Close tanks after each usage and leave them clean.
- Store away from hot temperatures, in a cool environment, not under sunlight.
- Store away from chemicals such as bleach or other strong smelling cleaning materials.
- Store away from areas where there is potential for pollution, such as excess dust.
- Ensure that no water or foreign materials get into the drum.
- Limit the number of decants where possible.
- Tanks should have a specific pump applied to them to avoid any cross contamination.
- Ensure that the funnel/pumps used for refilling and the neck of refill drums are kept clean at all times.
